

## BUSINESS LITIGATION

### OVERVIEW

No one will fight harder for you. Whether you are a defendant or plaintiff, business or individual, no one will prepare your case for trial more thoroughly than our civil and business litigation lawyers in Minneapolis, and no one will represent you at trial with greater commitment, vigor or tenacity. Moreover, no one understands that better than opposing attorneys – which is why we are so often successful in obtaining favorable settlements without ever going to trial.

From civil litigation to business litigation issues, we built this practice with one goal: to marshal all the talent, experience and resources at our command to give our clients the quality of representation they need when appearing before judge and jury. In this sense, the litigation practice spans the entirety of the firm, because our litigation attorneys in Minneapolis draw on the collective legal experience of everyone at Hellmuth & Johnson.

The results speak for themselves — in our impressive record of wins in lawsuits, trials, arbitrations, mediations and appeals; in the litigation practice’s diversity of clients, who range from individuals to community associations, construction firms, real estate developers, businesses and corporate clients; and in our ability to achieve optimal outcomes both quickly and cost-effectively.
