CONSTRUCTION & LIEN LAW

## OVERVIEW

We are structured for your success. Whether drafting contracts or enforcing them, our construction contract and lien attorneys in Minneapolis draw on a wide array of tools and talents to serve clients, including general contractors, subcontractors, material suppliers, and property owners.

In the area of residential and commercial construction law, our lien and construction lawyers are well versed in Minnesota law and able to respond quickly and effectively to our clients' needs. We understand that some situations demand highly sophisticated agreements, while others only require abbreviated versions of contracts. Regardless of the situation, our industry knowledge enables us to streamline the legal process while developing targeted solutions that help our clients save time and money.

When real estate owners or general contractors fail to follow through on their financial commitments to contractors, subcontractors and materials suppliers, our construction litigation lawyers assist clients with mechanics' liens, including advising them on the process and language, aiding with enforcement, and helping with filing, serving and foreclosure from demand to resolution.
